-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1731

1. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
2. Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims not been further treated on the merits.
3. The use of the trademark METHOCEL (page 2, line 22) has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

4. Claims 1-4 are objected to because of the following informalities:

In claim 1, line 6, "an uranium" should be changed to - - a uranium - -.

Appropriate correction is required.

In claims 1 and 3, the steps should all be listed in the same form so that the claim is grammatically correct. For example, if steps begin with "washing" and "introducing", then the other steps should be amended to read - - preparing - - rather than "preparation of".

Art Unit: 1731

5. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The addition of the word "type" to an otherwise definite expression extends the scope of the expression so as to render it indefinite. *Ex Parte Copenhaver*, 109 USPQ 118 (Bd. App. 1955).

If a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 USC 112, second paragraph. See MPEP 2173.05(u). Claim 4 appears to use the trademark METHOCEL.

6. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

7. Claims 2-4 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest the claimed method of producing mixed oxide nuclear fuel pellets. Bauer et al. (5,841,200) discloses the steps of preparing a U-Pu oxide blend powder having excess Pu ; preparing a uranium oxide powder; mixing the powders; compacting and sintering the mixture. Bauer et al. also generically teaches producing the uranium oxide powder from uranyl nitrate. Bauer et al. does not disclose the steps for such

Art Unit: 1731

production. EP 1020873 teaches the formation of nuclear fuel pellets from a uranyl nitrate precursor. This process does not however produce a uranium oxide powder. Nor does it teach the steps of thermal treating beads in both an oxidizing atmosphere and a reducing atmosphere. Rather, this reference teaches treating some beads in an oxidizing atmosphere and some in a reducing atmosphere.
